Advanced Persistent Threat

A sophisticated adversary with significant resources has a foothold within your infrastructure.

Steal a System Card from another player.

Botnet

Many infected computers are working together to disable your infrastructure. Resistance is futile.

Steal a System Card from another player.

Cross-Site Request Forgery

Something is making you unwittingly perform unwanted actions on a web application that you are authenticated to use.

Steal a System Card from another player.

Zero Day

Your System has had a hidden vulnerability for a long time. It is about to be exploited.

Steal a System Card from another player.

Trojan Horse

You downloaded useful software that had malicious code hidden within it.

Steal a System Card from another player.

Infiltrator

An unauthorized person has been stealing your digital assets from within the walls of your organization.

Steal a System Card from another player.

TURN PROCEDURE

1. Draw 3 Action cards OR 1 System Card.

A new System Card must be placed into an available position immediately. Any new Firewall cards must also be placed immediately.

2. Choose **ONE** Task: Attack OR Fortify.

- * **Attack** - You may attack one or more players as many times as you are able.
- * **Fortify** - Repair as many Systems as you are able by discarding a card of the same domain (color) as the compromised one. You may also rearrange System cards, as necessary.

TURN PROCEDURE

1. Draw 3 Action cards OR 1 System Card.

A new System Card must be placed into an available position immediately. Any new Firewall cards must also be placed immediately.

2. Choose **ONE** Task: Attack OR Fortify.

- * **Attack** - You may attack one or more players as many times as you are able.
- * **Fortify** - Repair as many Systems as you are able by discarding a card of the same domain (color) as the compromised one. You may also rearrange System cards, as necessary.
